Integrating IR (Infrared) devices in Loxone automation system using Kincony KC868-G Gateway.

Loxone Config setup for controlling FAN (IR Appliances) using KC868-G

Step 1. Save/Capture / learn the IR commands from your IR remote in KC868G using Node Red

Youtube link - Node Red / HomeKit Integration link :

<https://youtu.be/oENXInWr3k8>

This video link will help you understand how to capture IR signals for your IR Remote control and integrate it in Node Red. This same procedure is used to integrate IR devices in Loxone

All appliances can be remote controlled by only one smart phone
Support 5,000+ models of home appliances: TV, Set-Top Box, Air-conditioning, Loudspeaker Box, Motor Curtain...
No matter IR remote, or RF remote, only one smart phone can control everything!

KC868-G
